

Santosh Kumar

📍 Chennai, Tamilnadu

🔗 Portfolio | [in santosh7131](#) | [🌐 Santosh7131](#)

Executive Summary

Full Stack and Machine Learning Developer skilled in building intelligent, scalable systems. Engineered **MERN applications** with integrated **ML pipelines**. Proficient in Python, React, Node.js, and Express with proven ability to deliver **production-ready solutions**.

Education

B.Tech SRM Institute of Science and Engineering

Jun 2023 – May 2027

- GPA: 8.8/10.0
- **Course:** Computer Science and Engineering

B.S Indian Institute of Technology, Madras

Jun 2023 – May 2027

- **Course:** Data Science and Machine Learning

Experience

Integra, Full Stack Developer Intern

Chennai, India

Jun 2025 – Jul 2025

- Developed a **MERN automation platform** reducing manual data entry time by **75%** using **Azure OCR + Groq API**.
- Created a **prototype** processing **10 forms in 15s** with **90% OCR accuracy**.
- Automated data extraction and storage via **Azure OCR** and **Groq LLM**, streamlining workflows.

Projects

XtractIQ — Automatic Document Data Extractor | Intern and Personal Project

(May 2025) [XtractIQ](#)

- Developed a **React + TypeScript** web app processing **15 scanned forms in 10s** using **Azure OCR + Groq API**.
- Built a **schema-free extraction pipeline** adapting dynamically to form structures.
- Designed a **review interface** ensuring 100% accuracy before **PostgreSQL** sync.
- Deployed on **Neon DB** with robust batch handling of 15+ documents in 22s.

AURA Preprocessor — AI-Powered ML Tool | Personal Project

(May 2025) [AURA](#)

- Built an **AI-driven data preprocessing platform** with **FastAPI + React TypeScript**.
- Integrated **Groq Llama-3.3-70b-versatile** for smart auto recommendations and cleaning strategies.
- Added 15+ ML preprocessing modules with **pandas** and **scikit-learn**.
- Delivered real-time progress UI via **Material-UI** with responsive polling.

Portfolio Website — Full Stack Project | Personal Project

[Portfolio Website](#)

- Built a **React + TypeScript** - single page application with a custom **state machine navigation system**, achieving **sub-200ms page transitions** and maintaining **60fps** animation performance.
- Created a **data-driven architecture** enabling **90% faster content updates** without code changes and full **TypeScript coverage** across all 8 core components.
- Implemented **Framer Motion AnimatePresence**, **glassmorphism**, and parallax for a modern UI, ensuring **zero layout shifts** and smooth performance across **4K to mobile** displays.
- Optimized build pipeline with **Vite**, reducing bundle size by **60%** and achieving **sub-2s initial load times** on **Vercel**.
- Tools: **React**, TypeScript, Tailwind, **Framer Motion**, Vite, **Vercel**.

Technologies

Languages: Python, JavaScript, TypeScript, C++, Java, SQL

Frameworks: React, Node.js, Express, FastAPI, pandas, scikit-learn

Tools: Azure OCR, Groq API, PostgreSQL, MongoDB, Docker, Git, Vercel

Certifications

Developer Certification in Responsive Web Design – freeCodeCamp

[View Certificate](#)

- Completed a **300-hour program** covering HTML5, CSS3, Flexbox, Grid layouts, and accessibility principles.
- Built multiple responsive projects demonstrating modern **front-end development** proficiency.

Red Hat Certified Specialist in Containers – Red Hat

[Verify Credential](#)

- Industry-recognized certification demonstrating expertise in **Linux containers**, **Docker**, and containerized application deployment.
- Certification ID: 260-018-775

Issued: Feb 2026

Awards

IoT Course Expo (SRM) – Second Runner-Up

- Secured **Second Runner-Up** for developing a **smart greenhouse automation system** recognized for innovation and real-world impact.

Wells Fargo Ideathon 2025 – Second Place

- **Secured 2nd place** for presenting **AURA**, an **AI-driven financial assistant** automating personal and business finance.
